PDF and ePub. So we have our three skills in place and it is time to go back and address the problems we encountered during the implementation of last week's progress. One issue was that we tried to implement our layout in a content-aware manner without considering the responsiveness of the app. Another was that we were using existing widgets such as the Button, ImageView, and TextView widgets. These widgets may be good for static content, but they are not ideal for animating the

---

creation of dynamic content. Lastly, we needed a way to save and reload the current state of the app, which requires us to maintain and support two different versions of the app: one for the emulator and one for the actual device. If you missed last week's progress, you can view the video of it here: [Android App Development with Swift This week](#), we'll take a look at how we can achieve the previous goals of the app using some of the newer features of Android Studio and Xcode. Prerequisites  
Android Studio 1.4.0 or later Xcode 10.0 If you are using a different version of Android Studio or Xcode, you can install the latest version using the following instructions from the Android Studio or Xcode website: Open Android Studio or Xcode, go to the menu bar, select the "Help" menu, then select "Check for Update." The current version of Android Studio and Xcode should now appear on the Android Studio or Xcode website. Once you have the correct version installed, open Android Studio or Xcode, go to the menu bar, select the "File" menu, then select "Close." Open a new file by going to File > New > File. Name the new file "LuckyNumbers." Creating the User Interface Let's start by creating the user interface of the app. Select the LuckyNumbers. Each screen of the app will consist of a group of three LuckyNumbers widgets. On the LuckyNumbers.ktx file, we'll create three groups of three widgets for the three screens. Each screen will have a button to go to the next screen and a view to show the number that was selected. LuckyNumbersViewGroup The LuckyNumbersViewGroup is the central container for each screen in the LuckyNumbers app. When 82157476af
